

SOFTWARE REQUIREMENTS SPECIFICATION

SIWS School Website

Main Portal & Independent Unit Websites

This Software Requirements Specification defines the requirements for the SIWS school website — a main SIWS portal linking four independently managed unit websites (Kindergarten, Primary, Secondary and Junior College), together with a browser-based admin panel that lets school staff add, edit and remove content directly.

Version 2 · 17 July 2026 · Draft for review

Prepared by DigiVeritaz for SIWS Management & Unit Heads

Document Control

Field	Value
Document title	SIWS School Website — Software Requirements Specification (SRS)
Version	2
Status	Draft for review
Date	17 July 2026
Prepared by	DigiVeritaz
Prepared for	SIWS Management and Unit Heads
Companion document	SIWS School Website — Visual Requirements Guide
Distribution	SIWS management, unit heads, designated content managers, project team

Revision History

Version	Date	Author	Summary of changes
1	16 July 2026	DigiVeritaz	Initial draft issued for review.
2	17 July 2026	DigiVeritaz	Incorporates additional requirements raised by SIWS on 17 July 2026. New modules: newsletter and email subscription (5.14); alumni section (5.16); unit-wise FAQ (5.17); emergency notice banner (5.18); careers and recruitment (5.19); mandatory documents (5.20); download centre (5.21); annual calendar (5.22); parent feedback (5.23); quick links and home-page components (5.24); privacy, cookie consent and data protection under DPDPA 2023 (5.25). New back-end sections 6.8–6.9 covering subscriber data, and data protection and retention. Section 4 site structure, Section 7 non-functional requirements, Section 8 permissions matrix, Section 9 deliverables and Section 11 glossary updated accordingly.

1. Introduction

1.1 Purpose

This Software Requirements Specification (SRS) defines the functional and non-functional requirements for the SIWS school website project. It describes a main SIWS portal (host page), four independently managed unit websites — Kindergarten, Primary School, Secondary School and Junior College — and the administrative panel (Content Management System) that enables school staff to manage all content directly. This document is the authoritative reference for design, development, testing and acceptance of the platform.

1.2 Project Scope

The project delivers a single web platform presented as a main SIWS landing page that links to four independent unit websites. Each unit site shares a common, consistent design system while being managed independently by an assigned content manager under the supervision of the respective unit head. A browser-based admin panel lets non-technical staff add, edit and remove pages, news, media and other content without writing any code. The website functions primarily as an information, communication and engagement platform for parents, students, prospective applicants, alumni and the wider school community.

In scope:

- Main SIWS portal (host page) linking to all four unit websites.
- Four independent unit websites: Kindergarten, Primary School, Secondary School and Junior College.
- Admin panel (CMS) with role-based access and independent per-unit content management.
- Content modules: news, announcements and events; admissions information and online enquiry; photo and video galleries; student wall; achievements; value-based quotes and stories; faculty profiles; curriculum and academics; facilities and campus; transport and bus routes; Junior College transition.
- Engagement and outreach modules: newsletter and email subscription; social media feed integration; a dedicated alumni section; unit-wise FAQ; careers and recruitment; and a parent feedback channel.
- Information and compliance modules: emergency notice banner; mandatory documents and statutory disclosure; download centre; annual calendar; quick links; accessibility features; cookie consent; and a privacy and data protection page aligned to the Digital Personal Data Protection Act (DPDPA), 2023.
- Site-wide search, contact pages with maps, and SEO essentials for online visibility and branding.

Delivery phases

- **Phase 1 — Website.** Everything specified in this document, delivered in a single language and without a virtual campus tour.
- **Phase 2 — Multi-language support.** The site translated into additional languages, with a language selector and per-language content management.
- **Phase 3 — Virtual campus tour.** An interactive walk-through of the campus, linked from the facilities and campus pages.

This SRS specifies Phase 1 only. Phases 2 and 3 are separate engagements, each scoped, quoted and scheduled after Phase 1 goes live.

1.3 Out of Scope

This project is a public website with a content-management admin panel only. It does not include, replace or integrate with the school's existing cloud-based Student Attendance Management System (SAMS). All of the following SAMS modules are delivered by that system and are entirely outside the scope of this project:

Handled by the existing SAMS — NOT part of this project

- Student / Staff Information Management
- Attendance (Student & Staff)
- Timetable Management
- Parent (PTA Group) / School Communication
- Online Admission
- Assignment Management
- Fees Modules (Offline & Online) and Payment Gateway
- Progress Card (Report Card)
- Leaving Certificate, Bonafide and Conduct Certificate
- SMS / Notification
- Mobile App
- Gallery and media within SAMS
- Holiday List

The following are also excluded:

Also excluded

- Any integration or data exchange with SAMS — no student or staff records, marks, attendance or fee data flow to or from the website.
- Hosting, domain registration and deployment infrastructure procurement — arranged separately by SIWS.
- Online fee or payment processing and any e-commerce functionality.
- Native mobile applications (the website is fully responsive on mobile browsers).
- Drafting of legal text — the privacy policy, cookie policy, data-retention schedule and statutory disclosures are authored and approved by SIWS; the website presents and administers them.
- Multi-language / multilingual content — the website is delivered in a single language (Phase 2).
- Virtual campus tour — the interactive campus walk-through (Phase 3).
- Applicant tracking, shortlisting or interview management for careers — the website publishes vacancies and receives applications only.
- Email-delivery infrastructure (bulk sending service and sending domain) — arranged by SIWS; the platform integrates with it.

Scope boundary: The public website keeps its own front-facing content — institutional pages, news and events, a public photo/video gallery, achievements, the student wall, alumni and careers content — which are marketing and engagement content distinct from the operational features inside SAMS. All such content is managed through the website's admin panel and holds no student records.

1.4 Intended Audience

This document is intended for SIWS management, unit heads, designated content managers, the DigiVeritaz project and development team, and reviewers involved in quality assurance and user acceptance testing.

1.5 Definitions, Acronyms and Abbreviations

Key terms and acronyms used throughout this document — including SRS, CMS, WYSIWYG, UAT, SEO, HTTPS, DPDPA, RPO and RTO — are defined in Section 11 (Glossary).

1.6 References

- SIWS School Website — Visual Requirements Guide (companion document).

- Additional requirements raised by SIWS management and unit heads, 17 July 2026.
- Stakeholder requirement notes provided by SIWS unit heads.
- The Digital Personal Data Protection Act, 2023 (Act No. 22 of 2023), Government of India.
- Web Content Accessibility Guidelines (WCAG) 2.1, W3C Recommendation.

2. Overall Description

2.1 Product Perspective

The platform replaces the current static site with a dynamic, content-managed web presence. It is organised as one main SIWS portal that acts as the host/landing page, from which visitors reach four independent unit websites. Although each unit site is managed independently, all sites run on a single shared platform and CMS, so branding, navigation patterns and quality remain consistent across the institution. Navigation depth is kept to two clicks or fewer from any home page.

2.2 High-Level Product Functions

- Present institutional and unit-level information in a clear, easily navigable structure.
- Enable school staff to add, edit and remove content independently through an admin panel.
- Publish news, announcements, events, galleries, achievements and student work.
- Provide admission information, downloadable forms and an online enquiry channel.
- Raise time-critical notices to the whole community through an emergency notice banner.
- Sustain ongoing engagement through newsletter subscription, social media feeds, an alumni section and a parent feedback channel.
- Showcase the campus through a photo gallery, and answer common queries through unit-wise FAQ pages.
- Publish statutory and mandatory documents, an annual calendar and a consolidated download centre.
- Operate transparently and lawfully with respect to personal data, including consent capture and published privacy information under the DPDPA, 2023.
- Support site-wide search, contact and map integration, and strong SEO.

2.3 User Classes and Characteristics

User class	Characteristics
Administrator	Technical/administrative owner with full control of the platform, all units, users and configuration.
Unit Head (Approver)	Principal or head of a unit; reviews and approves content before it is published for that unit.
Unit Content Manager	Designated staff member responsible for adding, editing and removing content within a single assigned unit.
Editor / Staff	Staff with limited rights to update specific sections (e.g. news or gallery) within an assigned unit.
Data Protection Officer / Grievance Contact	Nominated SIWS officer who receives and actions data-subject requests and grievances under the DPDPA, 2023; has admin-panel access to consent records, retention settings and personal data captured by forms.
Public visitor	Parents, students, prospective applicants and the general public; view-only access to published content.
Subscriber	A public visitor who has given consent to receive the newsletter or other email updates; can manage preferences and unsubscribe at any time. Holds no admin-panel login.
Alumnus / Alumna	A former student who browses the alumni section and may submit registration, profile or event-interest details for staff review. Holds no admin-panel login.
Job applicant	A member of the public who views published vacancies and submits an application through the careers page.

2.4 Operating Environment

The public website and the admin panel are browser-based and run on current versions of major browsers (Chrome, Firefox, Safari and Edge) across desktops, tablets and smartphones. No software installation is required for staff to manage content — the admin panel is reached through a secure web login.

2.5 Design and Implementation Constraints

- A consistent design template must be applied across all unit sites for brand cohesion.
- Navigation to any primary page must be achievable in two clicks or fewer from the home page.
- All pages and admin access must be served over HTTPS.
- URLs and page markup must follow SEO-friendly conventions, including structured data (schema.org).
- The admin panel must be usable by non-technical staff with minimal training.
- No non-essential cookie, tracker, analytics tag or third-party embed may execute before the visitor has given consent (see 5.25).
- Because the site concerns a school and its visitors include children, no behavioural tracking, profiling or targeted advertising directed at children may be implemented, in line with Section 9 of the DPDPA, 2023.
- Third-party embeds (social feeds, video, maps) must degrade gracefully: if the provider is unavailable or consent is withheld, the page must remain usable and must not break layout.

2.6 Assumptions and Dependencies

- SIWS will provide content (text, images, documents, faculty details and route information) in a timely manner.
- SIWS will designate one content manager and one approving head per unit.
- The school's existing management system remains the system of record for student academic data; no data migration or integration is required.
- Hosting, domain and deployment are arranged by SIWS (see Section 1.3).
- SIWS will supply, and take responsibility for, all legal text — privacy policy, cookie policy, data-retention schedule, terms of use and statutory disclosures — and will nominate the Data Protection Officer / grievance contact to be published under the DPDPA, 2023.
- SIWS will confirm the official social media handles to be surfaced on unit home pages, and will hold the accounts and any API credentials or access tokens those platforms require.
- SIWS will provide the school's YouTube channel details for the video gallery.
- SIWS will arrange a bulk email-delivery service and authorise a sending domain (including SPF, DKIM and DMARC records) for newsletter dispatch.
- SIWS will confirm the authoritative list of mandatory documents required by its affiliating board and regulators, and will keep those documents current.
- Backup, replication and disaster-recovery capability depend on the hosting arrangement SIWS procures; the recovery objectives in Section 7 assume hosting that supports automated off-site backups.
- SIWS will confirm the escalation list authorised to raise an emergency notice, and the alumni data (where any exists) to be seeded into the alumni section.

3. System Architecture

How the platform is structured — a public front end, an administrative back end, and a per-unit content governance model.

3.1 Architectural Overview

The solution consists of a public-facing front end and an administrative back end (the admin panel) that share a common content store. The main SIWS portal sits at the top of the structure and links out to four independent unit sites. Each unit site draws its content from the same CMS but is scoped so that its content manager works only within that unit.

Layer	Description
Main SIWS portal	Host/landing page presenting the institution and routing visitors to each unit website; surfaces institution-wide news, highlights and quick links.
Unit websites (x4)	Independent sites for Kindergarten, Primary, Secondary and Junior College, each with its own pages, news and galleries.
Admin panel (CMS)	Secure back-end where staff add, edit and remove content; enforces role-based, per-unit access and an approval workflow.
Shared content store	Single database/content repository underpinning all sites, enabling consistent design and site-wide search.
Notice and engagement services	Cross-cutting services that operate above the unit boundary — the emergency notice banner, newsletter subscription and dispatch, and consent management.
Third-party integrations	External services embedded into the front end — social media feeds, YouTube video, Google Maps, analytics and the email-delivery service. All are consent-gated and fail gracefully.

3.2 Front End (Public Website)

The front end renders all published content responsively across devices. It comprises the main portal and the four unit sites, each following the shared design system, with clear navigation, prominent tabs and site-wide search. It also carries the cross-cutting presentation elements — emergency notice banner, cookie consent banner, quick links and accessibility controls — consistently on every page.

3.3 Back End (Admin Panel / CMS)

The admin panel is the core of the platform's manageability. It provides a secure, browser-based interface where authorised staff create and maintain content through a rich-text editor and a central media library. Access is role-based and scoped per unit, and content passes through an approval step before publishing. It additionally holds the personal data captured by public forms — enquiries, subscriptions, feedback, alumni registrations and job applications — under the retention and consent controls specified in Section 6.9. Detailed back-end requirements are specified in Section 6.

3.4 Content Governance Model

Each unit is responsible for its own content. A designated content manager adds, edits and removes content within the unit and submits changes for approval; the respective unit head (or a delegate) reviews and approves before the content is published. Administrators retain oversight across all units. This reflects the agreed model that a responsible person updates each unit's content under the supervision of its head.

Two categories sit outside the standard per-unit flow. Emergency notices are time-critical and publish immediately without the review step, restricted to a nominated authorised list (see BR-PUB-04). Institution-wide content — the main portal, mandatory documents, privacy and cookie policy, and platform configuration — is governed centrally by administrators in consultation with SIWS management.

4. Site Structure and Navigation

4.1 Main SIWS Portal (Host Page)

The main portal introduces SIWS and provides clear entry points to each unit website, alongside institution-wide highlights and quick links.

- Institution overview — story, mission, leadership and accreditations.
- Prominent links to each unit site (Kindergarten, Primary, Secondary, Junior College).
- Institution-wide news, achievements and featured highlights.
- Emergency notice banner, displayed above all other content when active.
- Quick links panel to the most-requested destinations across the institution.
- Alumni section entry point and alumni highlights.
- Careers / recruitment entry point.
- Mandatory documents and statutory disclosure page.

- Newsletter subscription block.
- Accessibility controls.
- Global contact information and site-wide search.
- Footer links to the privacy policy, cookie policy, data protection page and grievance contact.

4.2 Unit Website Structure (Common Template)

Each unit website follows a common structure so parents and students find information consistently across units:

Section	Primary pages / contents
Home	• Emergency notice banner (when active) • Unit welcome and highlights • Latest news and featured announcements • Quick links panel • Social media feed — latest updates and activities • Rotating value-based quote • Newsletter subscription block
About the unit	• Overview, vision and approach • Head's message • Facilities and infrastructure • Campus gallery
Academics	• Curriculum and methodology • Faculty / teacher profiles • Annual calendar • Downloadable academic documents
Admissions	• Admission information for the level • Downloadable forms (PDF) • Online enquiry form • Admissions FAQ
Updates	• News, announcements and events • Photo gallery (by event) • Video gallery (school channel) • Download centre — circulars, forms, calendars
Student Wall	• Showcase of students' creative work • Achievements and highlights
Alumni	• Alumni overview and notable alumni • Alumni news, events and reunions • Alumni registration / stay-in-touch form
Transport	• Bus routes, stops and timings • Transport facility details and contact
FAQ	• Unit-wise frequently asked questions, grouped by category • Search within FAQ
Careers	• Current vacancies for the unit • Application form and document upload
Contact	• Department-wise contacts • Google Maps location • General contact form • Parent feedback form
Footer (all pages)	• Quick links, mandatory documents and download centre • Privacy policy, cookie policy and data protection page • Grievance / Data Protection Officer contact • Social media handles and newsletter subscription • Accessibility controls

Mandatory documents and statutory disclosure are published institution-wide on the main portal, with a unit-specific view where the affiliating board requires disclosure per unit (see 5.20).

4.3 Junior College Transition

The Junior College site additionally presents the transition pathway from Secondary School — courses and streams offered, and admission guidance for students moving up.

4.4 Navigation Principles

- All important tabs are clearly visible in the primary navigation.
- Any primary page is reachable in two clicks or fewer from the home page.
- Consistent header, footer and menu patterns across the portal and all unit sites.
- A quick links panel on every home page provides one-click access to the most-requested destinations, independent of the primary menu.
- The emergency notice banner, when active, appears above all other content on every page of the affected scope and is not suppressed by the menu structure.
- The accessibility controls are reachable from the header or footer of every page.
- All navigation is operable by keyboard alone, with a visible focus indicator and a skip-to-content link (see Section 7).

5. Functional Requirements

Requirements are grouped by module. Priority: High = required for launch, Medium = important, Low = desirable / optional.

5.1 Content Management System (Admin Panel)

Req. ID	Requirement	Priority
FR-CMS-01	Authorised users shall create, edit and delete pages and content blocks without writing code.	High
FR-CMS-02	The system shall provide a rich-text (WYSIWYG) editor for text, headings, links, images and embeds.	High
FR-CMS-03	Users shall upload, replace and remove images and PDF documents via a media library.	High
FR-CMS-04	Content shall support draft, preview and published states.	High
FR-CMS-05	Access shall be role-based and scoped so each unit's content manager edits only that unit's content.	High
FR-CMS-06	The system shall allow content to be scheduled to publish or unpublish at a set date and time.	Medium
FR-CMS-07	The system shall keep version history of pages and allow reverting to a previous version.	Medium

5.2 News, Announcements and Events

Req. ID	Requirement	Priority
FR-NEWS-01	Staff shall publish news and announcements that appear on the relevant unit home page and the main portal.	High
FR-NEWS-02	News shall be categorisable (e.g. Academic, Sports, Events, Notices).	High
FR-NEWS-03	The system shall provide a searchable, filterable news archive.	Medium
FR-NEWS-04	Announcements shall support a featured/pinned flag and an optional expiry date.	Medium
FR-NEWS-05	An events calendar shall list upcoming events with date, time, venue and description.	Medium

5.3 Admissions

The website provides admission information, downloadable forms and an enquiry channel only. The actual online admission application and any fee payment are handled by the existing SAMS (see Section 1.3).

Req. ID	Requirement	Priority
FR-ADM-01	Each unit shall present admission information relevant to its level (eligibility, process, dates, overview).	High
FR-ADM-02	The system shall provide downloadable admission forms (PDF).	High
FR-ADM-03	An online enquiry form shall capture prospective-parent details and route them to the assigned admissions contact.	High

Req. ID	Requirement	Priority
FR-ADM-04	Enquiry submissions shall be viewable and exportable within the admin panel.	Medium
FR-ADM-05	Enquiry and contact forms shall include spam protection (e.g. CAPTCHA).	Medium
FR-ADM-06	The enquiry form shall display a consent notice stating the purpose of collection, and shall record the visitor's consent before submission (see 5.25).	High

5.4 Media and Gallery

Req. ID	Requirement	Priority
FR-MED-01	The system shall provide a photo gallery organised by event/album.	High
FR-MED-02	Staff shall create albums and upload or remove images via the admin panel.	High
FR-MED-03	The system shall embed videos from the school's YouTube channel.	Medium
FR-MED-04	Galleries shall be responsive and serve optimised image sizes.	Medium

5.5 Student Wall (Creative Work)

Req. ID	Requirement	Priority
FR-SW-01	The system shall provide a Student Wall showcasing students' creative work (art, writing, projects).	High
FR-SW-02	Staff shall add, caption, categorise and remove student-work items via the admin panel.	High
FR-SW-03	Published student work shall respect a consent/privacy flag before appearing publicly. The flag shall record that verifiable parental consent has been obtained, by whom and on what date, and content without a recorded consent shall not be publishable (see 5.25).	High
FR-SW-04	The system may provide a moderated submission form for students/parents to submit work for staff approval.	Low
FR-SW-05	Staff shall be able to withdraw an item from public display on request, and the system shall record the withdrawal against the consent record.	High

5.6 Achievements

Req. ID	Requirement	Priority
FR-ACH-01	The system shall provide an Achievements section for academic, sports and co-curricular accomplishments.	High
FR-ACH-02	Staff shall add achievement entries with title, description, date, image and category.	High
FR-ACH-03	Featured achievements shall be displayable on unit home pages and the main portal.	Medium

5.7 Value-Based Quotes and Stories

Req. ID	Requirement	Priority
FR-VAL-01	The system shall provide a section for value-based quotes and stories (e.g. thought of the day, moral stories).	Medium
FR-VAL-02	Staff shall add, edit, schedule and remove quotes and stories.	Medium
FR-VAL-03	A rotating quote may be displayed on the home page.	Low

5.8 Faculty / Teacher Profiles

Req. ID	Requirement	Priority
FR-FAC-01	Each unit shall present teacher profiles with photo, name, designation, qualifications and an optional message.	High
FR-FAC-02	Staff shall add, edit, reorder and remove faculty profiles.	High

5.9 Curriculum and Academics

Req. ID	Requirement	Priority
FR-CUR-01	Each unit shall present curriculum and academic-approach details (subjects, methodology, affiliation).	High
FR-CUR-02	Staff shall maintain curriculum content and attach downloadable documents (syllabus, book lists).	Medium

5.10 Facilities and Campus

Req. ID	Requirement	Priority
FR-INF-01	The site shall present campus facilities and infrastructure (labs, library, sports, etc.) with descriptions and images.	High
FR-INF-02	Staff shall manage facility entries and their images.	Medium
FR-INF-03	Each unit shall present a campus gallery — a curated set of photographs showcasing the campus, classrooms, laboratories, library, sports and other facilities — giving visitors a visual walk-through of the campus.	High
FR-INF-04	Staff shall add, caption, reorder and remove campus-gallery images through the admin panel, drawing on the central media library and the photo-gallery capability in 5.4.	Medium

5.11 Transport and Bus Routes

Req. ID	Requirement	Priority
FR-TR-01	The site shall present transport details including bus routes, stops, timings and a transport contact.	High
FR-TR-02	Staff shall add and update route information and upload route documents (PDF).	Medium

5.12 Site-Wide Search

Req. ID	Requirement	Priority
FR-SR-01	The main portal and each unit site shall provide site-wide search across pages, news and downloads.	High
FR-SR-02	Search results shall be relevance-ranked and link directly to the content.	Medium
FR-SR-03	Search shall also cover FAQ entries, alumni news, careers vacancies and download-centre items.	High

5.13 Contact and Communication

Req. ID	Requirement	Priority
FR-CON-01	Each unit shall present department-wise contact details (phone, email, address).	High
FR-CON-02	Contact pages shall include a Google Maps location embed.	Medium
FR-CON-03	A contact form shall route messages to the relevant unit's designated inbox.	High
FR-CON-04	The published contact details shall include the Data Protection Officer / grievance contact for data-related queries (see 5.25).	High

5.14 Newsletter and Email Subscription

A channel through which parents, students, alumni and others opt in to receive updates from the institution or a unit.

Req. ID	Requirement	Priority
FR-SUB-01	Every site shall show a signup block capturing name, email and stakeholder type (parent, prospective student, alumnus, other).	High
FR-SUB-02	Signup shall use double opt-in — the subscription starts only after the person confirms by email.	High
FR-SUB-03	Subscribers shall choose which units and topics they hear from, and change this themselves later.	Medium
FR-SUB-04	Every newsletter shall carry a one-click unsubscribe link that works at once, without login.	High
FR-SUB-05	Staff shall compose, preview, schedule and send newsletters from the admin panel, using a template matching the site design.	High

Req. ID	Requirement	Priority
FR-SUB-06	Staff shall send to a chosen group — by unit, stakeholder type or topic.	Medium
FR-SUB-07	Staff shall build a newsletter from published content (news, events, achievements) without retyping it.	Medium
FR-SUB-08	The system shall record each subscriber's consent — purpose, time and source — and keep proof of the opt-in (see 5.25).	High
FR-SUB-09	The form shall include spam protection and shall not reveal whether an address is already subscribed.	Medium
FR-SUB-10	Newsletters shall go out through the email service SIWS arranges, which reports delivery, bounce and unsubscribe results to the admin panel.	Medium
FR-SUB-11	Addresses that unsubscribe or hard-bounce shall be dropped from future sends.	Medium

5.15 Social Media Feed Integration

Req. ID	Requirement	Priority
FR-SOC-01	Each unit home page shall show a live feed of recent posts from that unit's official social accounts.	High
FR-SOC-02	Administrators shall choose, per unit, which accounts appear and how many posts show.	High
FR-SOC-03	Official social handles shall be linked from the header or footer of every page.	High
FR-SOC-04	Where the embed uses cookies or tracking, the feed shall load only after consent; otherwise a placeholder shall link to the account (see 5.25).	High
FR-SOC-05	If a platform is down or errors, the page shall load normally and hide the feed.	High
FR-SOC-06	Feed content shall be cached so page speed does not depend on a live third-party response (see Section 7).	Medium
FR-SOC-07	Pages shall carry Open Graph and Twitter Card tags so shared links display correctly.	Medium

5.16 Alumni Section

An area presenting the alumni community, their achievements and events, and a way for former students to stay in touch.

Req. ID	Requirement	Priority
FR-ALM-01	The platform shall provide an alumni section, reachable from the main portal and every unit site.	High
FR-ALM-02	Staff shall publish alumni profiles with photo, batch/year, current role and an optional message.	High
FR-ALM-03	The section shall carry alumni news, events and reunions, using the existing news and events modules.	High
FR-ALM-04	An alumni registration form shall capture name, batch/year, unit, contact details and an optional message.	High
FR-ALM-05	Registrations shall sit in the admin panel for authorised staff to view and export, and shall stay private unless the alumnus consents and staff approve.	High
FR-ALM-06	Alumni who consent may be added as newsletter subscribers (see 5.14).	Medium
FR-ALM-07	The form shall show a consent notice covering purpose, retention and the alumnus's rights, and shall record consent (see 5.25).	High
FR-ALM-08	Alumni content shall appear in site-wide search, filterable by batch/year and unit.	Medium
FR-ALM-09	The section may include an alumni gallery and testimonials.	Low

5.17 Unit-Wise FAQ

Req. ID	Requirement	Priority
FR-FAQ-01	Each unit shall present an FAQ page addressing the common queries for that educational unit.	High
FR-FAQ-02	Staff shall add, edit, reorder, categorise and remove FAQ entries for their unit without code.	High
FR-FAQ-03	FAQ entries shall be groupable into categories (e.g. Admissions, Fees, Transport, Uniform, Academics) and shall be individually linkable by URL.	Medium

Req. ID	Requirement	Priority
FR-FAQ-04	FAQ content shall be included in site-wide search, and the FAQ page shall provide a search or filter within its own entries.	Medium
FR-FAQ-05	FAQ pages shall emit FAQPage structured data (schema.org) so that questions and answers are eligible for enriched search results (see BR-SEO-03).	High
FR-FAQ-06	A relevant FAQ subset shall be surfaceable on a related page — for example, admissions FAQ on the admissions page.	Medium

5.18 Emergency Notice Banner

A high-visibility banner for time-critical notices — unscheduled closure, weather disruption, examination or safety information — that must reach visitors immediately.

Req. ID	Requirement	Priority
FR-EMG-01	The system shall display an emergency notice banner above all other content on every page of the affected scope, on both the portal and unit sites.	High
FR-EMG-02	An authorised user shall raise, edit and remove an emergency notice from the admin panel in no more than three steps, and the notice shall appear on the public site within one minute of publication.	High
FR-EMG-03	An emergency notice shall be scoped to the whole institution or to one or more selected units.	High
FR-EMG-04	Emergency notices shall bypass the standard Draft → Review → Published approval workflow and publish immediately, restricted to the roles nominated in Section 8 (see BR-PUB-04).	High
FR-EMG-05	A notice shall carry a severity level (e.g. information, warning, critical) with a distinct visual treatment for each, meeting the contrast requirements in Section 7.	Medium
FR-EMG-06	A notice shall support an optional auto-expiry date and time, after which it is withdrawn automatically without staff action.	High
FR-EMG-07	A notice shall support an optional link to a fuller announcement or news item.	Medium
FR-EMG-08	A visitor shall be able to dismiss an information-level notice for the current session; warning- and critical-level notices shall not be dismissible.	Medium
FR-EMG-09	The banner shall be announced to assistive technology as an alert region and shall be reachable and dismissible by keyboard.	High
FR-EMG-10	Raising, editing and withdrawing an emergency notice shall be recorded in the audit log with user, action and timestamp (see BR-LOG-01).	High
FR-EMG-11	Only one emergency notice shall be active per scope at a time; raising a second shall require replacing or explicitly stacking the first, with a clear indication in the admin panel of what is currently live.	Medium
FR-EMG-12	The active-notice state shall not be defeated by page caching — a raised or withdrawn notice shall be reflected on cached pages within the one-minute target.	High

5.19 Careers and Recruitment

Req. ID	Requirement	Priority
FR-CAR-01	The platform shall provide a careers / recruitment page presenting current vacancies across the institution, filterable by unit.	High
FR-CAR-02	Staff shall add, edit, close and remove vacancy entries with title, unit, role type, qualifications, experience, description, closing date and contact.	High
FR-CAR-03	An online application form shall capture applicant details and allow upload of a résumé and supporting documents, subject to file-type and file-size validation (see BR-MED-04).	High
FR-CAR-04	Applications shall route to the designated recruitment inbox and shall be viewable and exportable in the admin panel by authorised staff only.	High
FR-CAR-05	A vacancy shall close automatically on its closing date and move to an archived state, no longer accepting applications.	Medium

Req. ID	Requirement	Priority
FR-CAR-06	The application form shall display a consent notice covering purpose and retention period, and shall record consent (see 5.25).	High
FR-CAR-07	Uploaded application documents shall be stored access-restricted, shall not be publicly addressable, and shall be excluded from site-wide search and the public media library.	High
FR-CAR-08	Vacancy pages shall emit JobPosting structured data (schema.org) so that openings are eligible for job-search indexing (see BR-SEO-03).	Medium
FR-CAR-09	The careers page shall present general information on working at SIWS and shall accept speculative applications where no vacancy is open.	Low

5.20 Mandatory Documents and Statutory Disclosure

The disclosure page required by the affiliating board and applicable regulators, presenting the school's statutory documents in a single, findable location.

Req. ID	Requirement	Priority
FR-MD-01	The platform shall provide a mandatory documents / statutory disclosure section presenting the documents required by the affiliating board and applicable regulators — for example recognition and affiliation certificates, trust or society registration, building and fire safety certificates, and the fee structure.	High
FR-MD-02	The section shall present, for each document, a title, category, document date, last-updated date and a downloadable file.	High
FR-MD-03	Staff shall add, replace, reorder and remove documents through the admin panel without code, with the previous file retained in version history (see FR-CMS-07).	High
FR-MD-04	The section shall be reachable from the footer of every page and shall be linked from the main portal, and shall present a unit-specific view where disclosure is required per unit.	High
FR-MD-05	The section shall display the general information mandated for public disclosure (e.g. school name, affiliation number, address, principal, contact details) as structured on-page content, not only as attachments.	High
FR-MD-06	Documents shall be published in a format that remains readable without proprietary software (PDF), and shall be indexed by site-wide search by title and category.	Medium
FR-MD-07	The system shall support an optional review-due date per document and shall alert administrators when a document is approaching or past that date.	Medium

The authoritative list of documents to be disclosed is confirmed by SIWS (see Section 2.6). The platform presents and administers whatever list SIWS specifies; it does not determine regulatory obligations.

5.21 Download Centre

Req. ID	Requirement	Priority
FR-DL-01	Each unit shall provide a download centre consolidating its downloadable files — circulars, forms, calendars, syllabi, book lists, route documents and notices — in one place.	High
FR-DL-02	Downloads shall be categorisable and filterable by category, and sortable by date.	High
FR-DL-03	Each entry shall display a title, description, category, file type, file size and published date.	High
FR-DL-04	Staff shall add, replace, categorise and remove downloads through the admin panel, drawing on the central media library rather than duplicating files (see BR-MED-01).	High
FR-DL-05	Downloads shall be included in site-wide search by title, description and category.	High
FR-DL-06	Downloads shall support the scheduled publish and unpublish behaviour in FR-CMS-06, so that a circular can be withdrawn automatically once superseded.	Medium
FR-DL-07	The download centre shall provide a search within its own entries and shall paginate long lists.	Medium
FR-DL-08	The system shall record a download count per file, visible in the admin panel, without identifying the visitor.	Low

5.22 Annual Calendar

Req. ID	Requirement	Priority
FR-CAL-01	Each unit shall present an annual calendar for the academic year, showing terms, examinations, events and holidays relevant to that unit.	High
FR-CAL-02	Staff shall add, edit and remove calendar entries through the admin panel, and shall be able to publish a full-year calendar document (PDF) alongside the on-page calendar.	High
FR-CAL-03	The calendar shall offer a month view and a list view, and shall be usable on a smartphone.	High
FR-CAL-04	Calendar entries and the events calendar in FR-NEWS-05 shall draw on a single event store so that an event entered once appears in both.	Medium
FR-CAL-05	Entries shall be categorisable (e.g. term, examination, event, holiday) with a distinct visual treatment per category.	Medium
FR-CAL-06	The calendar shall allow the academic year to be selected, and shall retain previous years in an archive.	Medium
FR-CAL-07	A visitor may export an entry or subscribe to the calendar in a standard format (e.g. iCalendar).	Low

The holiday list inside SAMS remains the operational record for the school (see Section 1.3). The annual calendar here is the public, front-facing presentation of the academic year and is maintained independently through the admin panel.

5.23 Parent Feedback

Req. ID	Requirement	Priority
FR-PF-01	Each unit shall provide a parent feedback form capturing the parent's name, contact details, ward's class or section, feedback category and message.	High
FR-PF-02	Feedback shall be categorisable (e.g. academics, transport, facilities, staff, suggestion, complaint) and shall route to the unit's designated inbox by category.	High
FR-PF-03	Submissions shall be viewable and exportable in the admin panel by authorised staff for that unit, and shall be trackable through an open / in-progress / closed state.	High
FR-PF-04	The form shall support optional anonymous submission, in which case no contact details are captured and no acknowledgement is sent.	Medium
FR-PF-05	A parent shall receive an acknowledgement on submission, on screen and by email where contact details were supplied.	Medium
FR-PF-06	Feedback shall never be published to the public site; it is visible only to authorised staff within the admin panel.	High
FR-PF-07	The form shall include spam protection and shall display a consent notice covering purpose and retention (see 5.25).	High
FR-PF-08	The system shall present a summary of feedback volumes by category and period in the admin panel.	Low

5.24 Quick Links and Home-Page Components

Req. ID	Requirement	Priority
FR-QL-01	The main portal and each unit home page shall present a quick links panel giving one-click access to the most-requested destinations (e.g. admissions, download centre, annual calendar, transport, contact, mandatory documents).	High
FR-QL-02	Administrators and unit content managers shall configure the quick links for their scope — label, destination, icon and order — through the admin panel without code.	High
FR-QL-03	A quick link shall be able to target an internal page, a download, or an external URL, and shall indicate when it opens an external site.	Medium
FR-QL-04	Quick links shall be reorderable by drag-and-drop and shall remain usable and legible on a smartphone (see BR-EDIT-03).	Medium
FR-QL-05	The quick links panel shall not count against the two-click navigation-depth principle; it complements rather than replaces the primary menu (see 4.4).	Medium
FR-QL-06	A quick link whose target is unpublished or deleted shall be flagged in the admin panel and shall not render as a broken link on the public site.	Medium

Req. ID	Requirement	Priority
FR-QL-07	The home-page composition — which components appear and in what order (highlights, news, quick links, social feed, quote, newsletter block) — shall be configurable per unit without redevelopment.	Medium

5.25 Privacy, Cookie Consent and Data Protection

The website collects personal data through its enquiry, subscription, alumni, feedback and careers forms, and presents content concerning children. This module covers the consent, transparency and rights mechanisms required under the Digital Personal Data Protection Act (DPDPA), 2023.

Req. ID	Requirement	Priority
FR-PRV-01	The site shall present a cookie consent banner on first visit, offering a clear accept-all, reject-all and manage-preferences choice, with reject no harder to exercise than accept.	High
FR-PRV-02	No non-essential cookie, tracker, analytics tag or third-party embed shall execute before the visitor has given consent for its category. Strictly necessary cookies may be set without consent and shall be disclosed.	High
FR-PRV-03	Consent shall be granular by category (e.g. strictly necessary, analytics, embedded media/social), and the visitor shall be able to review and withdraw consent at any time, as easily as it was given, from a persistently reachable control.	High
FR-PRV-04	The system shall maintain a cookie inventory — name, provider, purpose, category and duration — presented in the cookie policy and kept current as embeds change.	High
FR-PRV-05	The platform shall publish a privacy and data protection page setting out the privacy policy; what personal data is collected and for what purpose; how it is used and with whom it is shared; retention periods; the rights available to the individual; and how those rights are exercised.	High
FR-PRV-06	The privacy and data protection page shall publish the identity and contact details of the Data Protection Officer / grievance contact nominated by SIWS, and shall describe the grievance redressal route.	High
FR-PRV-07	Every form that collects personal data shall present, at the point of collection, an itemised notice in clear language stating the data sought, the purpose, the retention period and the rights available, with a link to the full privacy policy.	High
FR-PRV-08	Consent shall be captured by an unticked, affirmative action — never a pre-ticked box or an inferred consent — and shall be specific to the stated purpose. Data shall not be used for a purpose beyond the one consented to.	High
FR-PRV-09	The system shall record, for every consent given, the identity or reference of the individual, the purpose, the notice version presented, the timestamp and the source, and shall retain that record for as long as the data is processed.	High
FR-PRV-10	Where content concerns a child — including student work, photographs and video on the Student Wall, galleries and achievements — the system shall require verifiable parental consent to be recorded before publication, and shall block publication where no consent is recorded (see FR-SW-03).	High
FR-PRV-11	The platform shall not perform behavioural tracking or profiling of children, and shall not serve targeted advertising directed at children. Analytics shall be configured to exclude behavioural profiling and shall not be used to build individual profiles of visitors.	High
FR-PRV-12	The site shall provide a route by which an individual can request access to, correction of, or erasure of their personal data, and can withdraw consent; requests shall be raised to the Data Protection Officer and tracked to closure in the admin panel (see BR-DPA-03).	High
FR-PRV-13	Withdrawal of consent shall cease the associated processing, and the system shall stop using the data for that purpose without requiring the individual to contact the school again.	High
FR-PRV-14	The privacy policy, cookie policy and consent notices shall be versioned, with the effective date displayed and previous versions retained, so that the notice presented at the time of any past consent can be evidenced.	High
FR-PRV-15	Privacy, cookie and data protection pages shall be reachable from the footer of every page across the portal and all unit sites.	High
FR-PRV-16	Forms shall collect only the data necessary for the stated purpose, and each field's necessity shall be reviewable at design sign-off.	High
FR-PRV-17	The consent banner shall not obstruct the emergency notice banner or prevent access to the content beneath it.	Medium

The legal text presented by this module — the privacy policy, cookie policy, retention schedule and grievance route — is authored and approved by SIWS (see Section 2.6). The platform provides the mechanisms that present, capture, evidence and action it. This document describes system behaviour and is not legal advice;

SIWS should have its published text reviewed by its own counsel.

6. Admin Panel / Back-End Requirements

The admin panel is the platform's content-management core — this section specifies its behaviour in detail.

6.1 Authentication and Access Control

Req. ID	Requirement	Priority
BR-AUTH-01	Admin-panel access shall require secure username/password login over HTTPS.	High
BR-AUTH-02	The system shall enforce role-based permissions (Administrator, Unit Head, Content Manager, Editor).	High
BR-AUTH-03	The system shall support password reset and enforce a minimum password-strength policy.	Medium
BR-AUTH-04	Sessions shall time out after a defined period of inactivity.	Medium
BR-AUTH-05	Two-factor authentication may be available for administrator accounts.	Low
BR-AUTH-06	The system shall rate-limit and lock out repeated failed login attempts, and shall log them.	Medium

6.2 Content Editing — Add, Edit, Remove

Req. ID	Requirement	Priority
BR-EDIT-01	Content managers shall add, edit and remove pages, sections and content blocks within their assigned unit.	High
BR-EDIT-02	A WYSIWYG editor shall support formatting, links, images, tables and embeds.	High
BR-EDIT-03	The system shall allow reordering of pages, menu items and list content via drag-and-drop or ordering controls.	Medium
BR-EDIT-04	Content managers shall preview changes before publishing.	High
BR-EDIT-05	The editor shall sanitise pasted and embedded markup so that content entry cannot introduce script into a public page (see Section 7, Security).	High

6.3 Media Library

Req. ID	Requirement	Priority
BR-MED-01	A central media library shall store and organise images and documents (PDF).	High
BR-MED-02	Users shall upload, rename, replace and delete media, subject to permissions.	High
BR-MED-03	The system shall auto-optimize and resize images for web delivery.	Medium
BR-MED-04	File-type and file-size validation shall be enforced on upload.	High
BR-MED-05	Uploaded files shall be validated by actual content type rather than by file extension alone, and shall be stored so that an uploaded file cannot be executed by the server.	High
BR-MED-06	Media holding personal data — job application documents and any file attached to an enquiry or feedback submission — shall be stored in an access-restricted area, separate from the public media library, and shall not be publicly addressable (see FR-CAR-07).	High
BR-MED-07	The system shall warn before deleting a media item that is in use, and shall indicate where it is used.	Medium

6.4 Menu and Navigation Management

Req. ID	Requirement	Priority
BR-NAV-01	Administrators shall manage top-level menus and sub-menus per unit without code.	High
BR-NAV-02	Menu changes shall respect the two-click navigation-depth principle.	Medium
BR-NAV-03	Quick links shall be managed per scope, with label, destination, icon and order, independently of the primary menu (see FR-QL-02).	High

6.5 Publishing and Approval Workflow

Req. ID	Requirement	Priority
BR-PUB-01	Content shall move through Draft → Review → Published states.	High
BR-PUB-02	A unit head (or delegate) shall be able to review and approve content before it goes live.	High
BR-PUB-03	Published content shall be editable and able to be unpublished.	High
BR-PUB-04	Emergency notices shall bypass the review state and publish immediately. This bypass shall be restricted to Administrators, Unit Heads and Content Managers within their scope, every use shall be logged with user, action and timestamp, and the bypass shall apply to emergency notices only (see FR-EMG-04).	High
BR-PUB-05	An approver shall be able to return content to the author with a comment rather than only approving or rejecting it.	Medium
BR-PUB-06	The system shall notify the relevant approver when content is submitted for review, and the author when it is approved or returned.	Medium

6.6 User and Role Management

Req. ID	Requirement	Priority
BR-USER-01	Administrators shall create, edit, deactivate and delete user accounts.	High
BR-USER-02	Administrators shall assign users to units and roles.	High
BR-USER-03	Administrators shall nominate the Data Protection Officer / grievance contact, and shall nominate which users may raise an emergency notice.	High
BR-USER-04	Deactivating a user shall immediately end their sessions and revoke access, while preserving their authorship history and audit trail.	Medium

6.7 Audit, SEO and Housekeeping

Req. ID	Requirement	Priority
BR-LOG-01	The system shall log content changes with user, action and timestamp.	Medium
BR-LOG-02	The system shall additionally log access to, export of, and deletion of personal data, and every use of the emergency-notice publish bypass. These logs shall be retained and shall not be editable from the admin panel.	High
BR-SEO-01	Content managers shall set page title, meta description and URL slug per page.	High
BR-SEO-02	The system shall auto-generate sitemap.xml and support friendly URLs.	High
BR-SEO-03	The platform shall emit schema.org structured data appropriate to each content type — at minimum Organization / EducationalOrganization for the institution and units, NewsArticle for news, Event for events and calendar entries, FAQPage for FAQ, JobPosting for vacancies and BreadcrumbList for navigation — and shall validate without errors against the published specification.	High
BR-SEO-04	The platform shall support canonical URLs, a managed robots.txt, and per-page indexing directives.	High
BR-SEO-05	Content managers shall set Open Graph and Twitter Card metadata, including a share image, per page, with a sensible default derived from the page where none is set.	Medium
BR-SEO-06	The sitemap shall update automatically on publish and unpublish, and shall exclude unpublished, archived and access-restricted content.	High
BR-SEO-07	Changing a published page's URL slug shall offer to create a permanent redirect from the old address, and administrators shall be able to manage redirects without code.	Medium
BR-SEO-08	The staging site shall be excluded from search-engine indexing, and go-live shall include an explicit step to enable indexing on the production site.	High

6.8 Subscriber, Enquiry and Feedback Data Management

Req. ID	Requirement	Priority
BR-SUB-01	The admin panel shall present the personal data captured by public forms — admission enquiries, newsletter subscriptions, alumni registrations, parent feedback and job applications — each in its own scoped view.	High

Req. ID	Requirement	Priority
BR-SUB-02	Access to each view shall be restricted by role and by unit, so that a unit's staff see only that unit's submissions, and Administrators and the Data Protection Officer see all.	High
BR-SUB-03	Authorised staff shall search, filter and export submissions, and each export shall be logged with user, scope and timestamp (see BR-LOG-02).	High
BR-SUB-04	Each record shall display the consent captured with it — purpose, notice version and timestamp — alongside the data itself.	High
BR-SUB-05	Staff shall manage the subscriber list: view, segment, suppress and delete subscribers, and act on unsubscribe requests received outside the site.	High
BR-SUB-06	The admin panel shall show newsletter send history and per-send delivery, bounce and unsubscribe outcomes (see FR-SUB-10).	Medium
BR-SUB-07	Exports containing personal data shall carry a visible handling notice and shall not be generated by roles without export permission.	Medium

6.9 Data Protection, Retention and Consent

Req. ID	Requirement	Priority
BR-DPA-01	The system shall maintain a consent register recording every consent captured — individual, purpose, notice version, timestamp, source and current status — queryable by the Data Protection Officer (see FR-PRV-09).	High
BR-DPA-02	Administrators shall configure a retention period per data category (enquiries, subscriptions, alumni registrations, feedback, job applications, consent records, logs), and the system shall flag or purge records that reach it, according to the schedule SIWS confirms.	High
BR-DPA-03	The admin panel shall provide a data-subject request register through which access, correction, erasure and consent-withdrawal requests are recorded, actioned and tracked to closure with a timestamped history (see FR-PRV-12).	High
BR-DPA-04	Given an individual's identifier, the system shall locate and present every record held about them across all forms and modules, so that an access or erasure request can be actioned completely.	High
BR-DPA-05	Erasures shall remove the personal data from live records and from any derived copy the platform holds, while retaining the minimum evidence of the erasure itself in the audit log.	High
BR-DPA-06	Administrators shall manage the cookie inventory and consent categories from the admin panel, so that adding or removing a third-party embed updates the banner and cookie policy without code (see FR-PRV-04).	High
BR-DPA-07	The privacy policy, cookie policy and each form's consent notice shall be versioned in the admin panel, with effective dates and previous versions retained (see FR-PRV-14).	High
BR-DPA-08	Personal data shall be encrypted in transit and at rest, and shall be excluded from site-wide search, from the sitemap and from any public endpoint.	High
BR-DPA-09	The system shall support the identification and export of the personal data affected by a suspected breach, to assist SIWS in meeting its notification obligations.	Medium
BR-DPA-10	Backups containing personal data shall be encrypted, access-restricted and subject to a defined retention period.	High

7. Non-Functional Requirements

These define how the website must perform, not what it does.

Category	Requirements
Security	• All pages and admin access served over HTTPS • Protection against common web vulnerabilities (XSS, SQL injection, CSRF) • Personal data from forms stored securely, encrypted in transit and at rest, and access-restricted • Uploaded files validated by content type and stored so they cannot be executed • Access to and export of personal data logged and non-editable • Regular data backups maintained

Category	Requirements
Performance	- Pages load within 3 seconds on a standard broadband connection - Optimised for mobile and lower-bandwidth networks - Assets compressed and lazy-loaded where appropriate - Third-party embeds (social feeds, video, maps) loaded so that they do not block page render, and cached rather than fetched live on every request - An emergency notice reflected on the public site, including cached pages, within one minute of publication
Responsive design	- Fully responsive layouts across phones, tablets and desktops - Functional on current versions of Chrome, Firefox, Safari and Edge
SEO and visibility	- SEO-friendly URL structure and semantic markup - Meta tags, Open Graph tags and sitemap.xml in place; indexing enabled on production and disabled on staging - schema.org structured data per content type, validating without errors - Canonical URLs and managed robots.txt - Redirects preserved when a published URL changes - Analytics integration (e.g. Google Analytics / Search Console), configured without behavioural profiling and loaded only after consent
Accessibility	- WCAG 2.1 AA conformance targeted across the public site — alt text, colour contrast, keyboard navigation, semantic structure and labelled forms - Visitor-facing accessibility controls (text resize, high-contrast mode) on every page - Conformance verified during UAT by automated checks plus keyboard and screen-reader testing - Accessibility statement published, with a route to report a barrier
Privacy and data protection	- Aligned to the Digital Personal Data Protection Act, 2023 — itemised notice, purpose-limited consent, withdrawal, and published grievance contact - No non-essential cookie, tracker or embed executes before consent - No behavioural tracking, profiling or targeted advertising directed at children - Verifiable parental consent recorded before any child's image or work is published - Only the data necessary for the stated purpose collected; retention periods configured and enforced
Usability	- Admin panel usable by non-technical staff with minimal training - Important information reachable in two clicks or fewer, with quick links as a further shortcut - An emergency notice raiseable in no more than three steps under pressure
Maintainability	- New units, sites or pages can be added without redevelopment - Third-party embeds and the cookie inventory can be changed from the admin panel without code - Content and code structured for straightforward future updates
Reliability, backup & disaster recovery	- High availability targeted during school hours - Automated backups of content, media and database on a regular schedule, held encrypted and off-site - Recovery point objective (RPO): no more than 24 hours of content loss - Recovery time objective (RTO): service restored within 8 working hours of a declared failure - Backup success or failure actively reported; restore procedure documented and demonstrated before go-live - Failure of a third-party service does not take the site down — embeds degrade gracefully

RPO and RTO are stated as design targets and are to be confirmed against the hosting arrangement SIWS procures (see Section 1.3).

8. User Roles and Permissions

8.1 Roles

Role	Access level	Typical user
Administrator	Full control of the platform, all units, users, menus and configuration.	IT / platform administrator
Unit Head (Approver)	Reviews and approves content for the unit; oversight of the unit site; may raise an emergency notice for the unit.	Principal / head of unit

Role	Access level	Typical user
Unit Content Manager	Adds, edits and removes content within the assigned unit; submits for approval; may raise an emergency notice for the unit where nominated.	Designated staff member
Editor / Staff	Limited updates within assigned sections (e.g. news, gallery).	Section staff (optional)
Data Protection Officer	Cross-unit access to consent records, data-subject requests, retention settings and personal data captured by forms; no content-publishing rights by virtue of this role.	Nominated SIWS officer
Public visitor	View-only access to all published content.	Parents, students, applicants

8.2 Permissions Matrix

Capability	Admin	Head	Content Mgr	Editor	DPO	Public
View published website	✓	✓	✓	✓	✓	✓
Log in to admin panel	✓	✓	✓	✓	✓	—
Add / edit / remove content	✓ all	✓ unit	✓ unit	Limited	—	—
Submit content for approval	✓	✓	✓	✓	—	—
Approve & publish content	✓	✓ unit	Delegated	—	—	—
Raise / withdraw emergency notice	✓ all	✓ unit	✓ unit	—	—	—
Manage media library	✓	✓	✓	Limited	—	—
Manage menus & navigation	✓	✓ unit	—	—	—	—
Manage quick links	✓ all	✓ unit	✓ unit	—	—	—
Manage FAQ, alumni, careers, downloads, calendar	✓ all	✓ unit	✓ unit	Limited	—	—
Configure social media feeds	✓ all	✓ unit	—	—	—	—
Manage newsletter & subscribers	✓ all	✓ unit	✓ unit	—	—	—
Send newsletter	✓ all	✓ unit	Delegated	—	—	—
View enquiry, feedback & alumni submissions	✓ all	✓ unit	✓ unit	—	✓ all	—
View job applications	✓ all	✓ unit	Delegated	—	✓ all	—
Export personal data	✓ all	✓ unit	Delegated	—	✓ all	—
Manage mandatory documents	✓	✓ unit	—	—	—	—
Manage consent register & data-subject requests	✓	—	—	—	✓	—
Configure cookie inventory, privacy & retention	✓	—	—	—	✓	—
View audit logs	✓	—	—	—	✓	—
Manage users & roles	✓	—	—	—	—	—
Manage backups & restore	✓	—	—	—	—	—
System configuration	✓	—	—	—	—	—

Legend: ✓ = allowed · ✓ all = allowed across every unit · ✓ unit = allowed within the user's assigned unit · Limited / Delegated = allowed for assigned scope or when delegated · — = not allowed. DPO = Data Protection Officer; the DPO role may be held alongside another role, in which case the permissions combine.

9. Deliverables

- UI/UX design mockups for the main portal and unit sites, approved before development begins.
- A fully functional main SIWS portal and four independent unit websites with all specified modules.
- Admin panel (CMS) with role-based logins for administrators, unit heads and content managers.
- Newsletter subscription and dispatch, configured against the email-delivery service and sending domain arranged by SIWS.

- Alumni section, careers page, unit-wise FAQ, download centre, annual calendar and mandatory documents section, populated with the content SIWS supplies.
- Emergency notice banner, configured with the authorised escalation list SIWS nominates.
- Cookie consent banner, cookie inventory, privacy and data protection page, consent register, data-subject request register and configurable retention schedule, presenting the legal text SIWS supplies.
- Accessibility conformance report against WCAG 2.1 AA and a published accessibility statement.
- Automated backup configuration, a documented restore procedure, and a restore demonstrated once before go-live.
- SEO configuration — structured data, sitemap, canonical URLs, robots.txt and redirects — with indexing enabled at go-live.
- Full source-code ownership transferred to SIWS.
- Technical documentation and a user manual for content managers.
- A live staff training session on using the admin panel, covering routine content management, raising an emergency notice, and handling a data-subject request.

Note: hosting, domain and deployment infrastructure are arranged by SIWS and are outside this project's deliverables (see Section 1.3). Content and legal text are supplied by SIWS (see Section 2.6).

10. Project Plan and Timeline

Phase 1 is delivered in four stages spanning 8 to 11 weeks. Each stage concludes with an approval gate before the next begins.

Stage	Duration	Key activities	Gate
1. Discovery & Design	2–3 weeks	• Requirement confirmation and sitemap • Wireframes and UI/UX mockups • Content plan per unit • Retention schedule and mandatory-document list confirmed	Design approved
2. Development	4–6 weeks	• CMS build and admin panel • Main portal and four unit sites • All modules and site-wide search • Consent and backup configuration • Weekly demos on a staging URL	Build demo
3. Testing & UAT	1–2 weeks	• QA and cross-device/browser testing • Accessibility verification and restore test • Content population support • Staff user-acceptance testing • Staff training	UAT sign-off
4. Launch & Support	Day 1 + 12 months	• Go-live and handover • Technical and user documentation • 12 months maintenance and CMS guidance	Go-live

Project governance

Weekly progress demonstration on a staging URL; a single point of contact on each side; and an approval gate at every stage boundary.

Durations are indicative. The schedule can be phased (core portal and informational pages first) or compressed if an earlier go-live is required.

Phased Delivery and Cost

The platform is delivered in three phases. Only Phase 1 is specified and scheduled in this document.

Phase	Scope	Duration	Cost
1. Website	Everything specified in this SRS — main portal, four unit sites and the admin panel — in a single language and without a virtual campus tour.	8–11 weeks	Quoted for this phase
2. Multi-language support	The site translated into additional languages, with a language selector and per-language content management.	To be confirmed at scoping	Quoted separately
3. Virtual campus tour	An interactive walk-through of the campus, linked from the facilities and campus pages.	To be confirmed at scoping	Quoted separately

Project cost varies with the phases SIWS selects. Phase 1 may be commissioned on its own; Phases 2 and 3 are optional, are quoted separately, and may be taken up at any time after Phase 1 goes live. Commercial terms are set out in the accompanying proposal, not in this document.

11. Glossary

Term	Definition
SRS	Software Requirements Specification — the formal document defining what the system must do.
CMS	Content Management System — the admin panel that lets staff add, edit and publish content without writing code.
Admin panel	The secure back-end interface where authorised staff manage all website content.
WYSIWYG	What You See Is What You Get — a visual editor that shows content as it will appear when published.
UI / UX	User Interface / User Experience — how the website looks (UI) and how it feels to use (UX).
UAT	User Acceptance Testing — the phase where the school's team confirms the website works as expected.
SEO	Search Engine Optimization — building the site so search engines can find and rank it.
HTTPS	The encrypted, secure connection a browser uses to communicate with a website (the padlock icon).
Responsive design	Layouts that adapt automatically to phones, tablets and desktops.
Sitemap.xml	A file listing all pages of a website to help search engines index it.
CAPTCHA	A check that distinguishes real people from bots to protect forms from spam.
WCAG	Web Content Accessibility Guidelines — standards that make websites usable by people with disabilities.
Staging URL	A private, pre-launch copy of the site used for review and testing before go-live.
DPDPA	The Digital Personal Data Protection Act, 2023 — India's law governing how organisations collect, use, store and delete people's personal data.
Personal data	Any information about an identifiable individual — for example a parent's name, email address or phone number, or a student's photograph.
Data Protection Officer (DPO)	The person nominated by the school to answer data-related queries and grievances, whose contact details are published on the site.
Data-subject request	A request from an individual to see, correct or delete the personal data held about them, or to withdraw their consent.
Consent register	The record of every consent given — who, for what purpose, when, and against which version of the notice.
Double opt-in	A subscription method where the person confirms by clicking a link in a confirmation email, proving the address is theirs.
Cookie	A small file a website stores in the browser. Strictly necessary cookies make the site work; others (analytics, embeds) need consent.
Structured data (schema.org)	Hidden, standardised labels in a page's markup that tell search engines what the content is — an event, a job posting, an FAQ — so it can be displayed richly in results.

Term	Definition
Canonical URL	The single official address for a page, declared so search engines do not treat variants as duplicates.
Open Graph	Metadata that controls the title, description and image shown when a page is shared on social media.
robots.txt	A file telling search engines which parts of a site they may crawl.
RPO	Recovery Point Objective — the maximum amount of recent work that may be lost in a failure, expressed as a period of time.
RTO	Recovery Time Objective — the maximum time the service may be down before it is restored.
Disaster recovery	The plan and mechanisms for restoring the website after a serious failure or data loss.
SAMS	Student Attendance Management System — the school's existing cloud system, outside this project's scope (see Section 1.3).

12. Approval and Sign-off

By signing below, the parties agree that this Software Requirements Specification accurately captures the requirements for the SIWS school website project.

Role	Name	Signature	Date
SIWS Management			
Unit Head			
DigiVeritaz — Project Lead
